

Product Description:

GeneralClear Anti-Static Ready-to-Use is a pre-mixed, water-based solution designed to instantly eliminate static electricity and prevent dust attraction. It forms a clear, durable, and invisible anti-static film on treated surfaces. Ideal for plastic parts, electronics packaging, workstations, cleanroom garments, and more. Effective even in dry, low-humidity environments (<20% RH). Safe, biodegradable, and non-corrosive — perfect for routine use where static control is critical

Key Features & Benefits

- Effective static protection — no mixing required
- Works even in humidity below 20%
- Non-toxic, solvent-free, and biodegradable
- Leaves no streaks, residue, or strong odour
- Compatible with plastics, textiles, metals & more
- Safe for cleanrooms, electronics, and packaging
- No special handling or dilution needed

Application Guidelines

How to Apply:

- Spray evenly onto the surface
- Wipe if needed for uniformity
- Allow to air dry completely
- Reapply after heavy handling or cleaning

Best Used On:

- Plastic housings & casings
- Acrylics & glass
- Packaging & storage bins
- Workstations, mats, shelving
- Clothing & PPE (exterior only)

Use in a well ventilated environment.

If you accidentally splash into your eyes, rinse with water or go to the hospital for examination. Seal the container when not in use to avoid contact with children.

Product Specifications:

Surface resistance	$10^7 - 10^9 \Omega$
PH	7.5±0.5
Appearance	Light brown liquid
Odour	Mild
Coverage	About 60m ² /L
Specific Gravity	~1.0 (at 25°C)
Drying Time	10 – 30 minutes
VOC Content	Negligible / None (solvent-free)
Flash Point	Not applicable (non-flammable)
Shelf Life	12 months (sealed, at 15–25°C)
Packaging Options	750mL / 5L / 20L
